MacFonts2

QuickReference Guide

Installation

Insert the CD-ROM into your CD-ROM drive. A **macXware** Fonts CD icon will appear on your Desktop. Double-click the icon to open the welcome screen. To install the **FontManager**, simply drag the icon to your **Applications** folder. Once installed, you can click on the Font Manager icon to start the **FontManager**.

The **FontManager** is the easiest way for you to preview the available fonts from the **MacFonts2** CD. You can preview the style and script of the font prior to installing the font on your system.

The user interface will show you two main list windows. The list on the right will show fonts that are currently installed on your system and the list on the left shows the fonts available on the CD-ROM.

To use a font from the CD, you have 2 options.

Option 1: Activate Temporarily

This option will let you use the selected font in any application without actually installing it on your system. The font will be available for use until you perform a System Restart or Log Out.

Option 2: Install Permanently

This option will install the font onto your system so it's available to all applications at all times, even after a System Restart. The font will be installed in the ~\Library\Fonts directory. To uninstall fonts, simply deselect the checkmark to the left of each font.

For more information or for answers to commonly asked questions please visit www.macXware.com and click on *support*.

Also available from macXware

MacFonts

Add this best selling collection of over 1000 fonts in TrueType® format to your library of fonts.

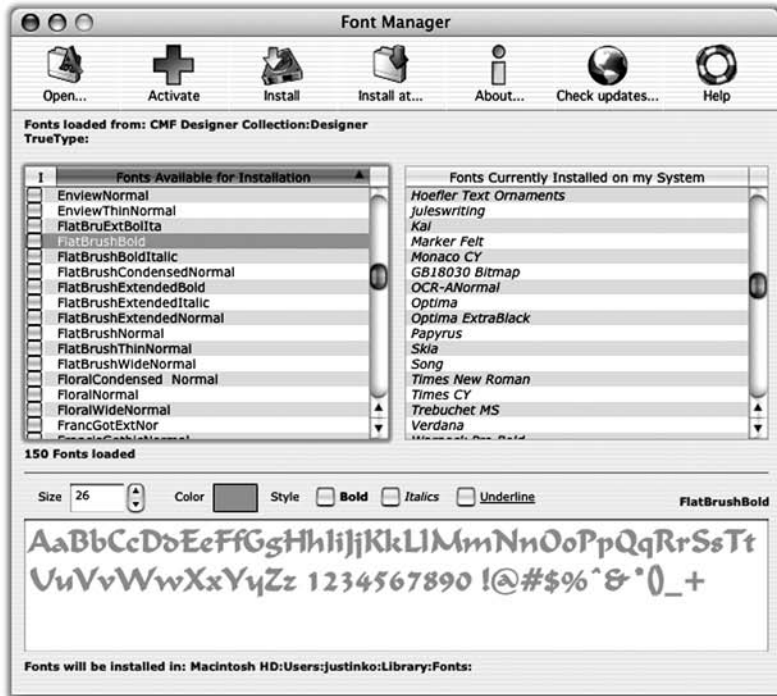

MoreMacFonts

Energize your creativity with 750 new, high quality TrueType® fonts.

FontManager™ Quick Overview

Open > select the location of fonts to view (TrueType® & PostScript®)

Activate > make selected font available to applications until restart or logout

Install > make selected font available to applications permanently (to uninstall, simply deselect the check box next to the font)

Install at > choose an alternate location to install fonts into

* All 1000 fonts are made available in both TrueType® & OpenType® formats. FontManager does not support OpenType® fonts and it is recommended that you use a professional font application to manage those fonts.
